DETAIL

The anti-bacterial key door is made of metal with a 2.5 cm ring. Contactless door opens, designed ergonomically for easy grip, allowing you to open doors and handles, and make selections on a touch screen. The dimensions of the hygiene keys: 7.3 x 2.7 x 0.45 cm. Practical and easy to transport, the keys keep the hands clean and the keys are easy to clean.

DESCRIPTION

The contactless metal door opener, easy to transport limits contamination. **Hygiene keys prevent** contact with doors, touch screens or other devices. **The contactless door opener** easily hangs on your key chains, so you can take it anywhere. The anti-bacterial keyring has been specially designed to provide a natural and comfortable grip, allowing you to operate and pull the door handles effortlessly. **With this contactless key**, you greatly reduce the risk of contamination from surfaces that contain many pathogens. Sold to unit 2.90.
